

Figure 1: Fig (3) from APL **75**, 17 2581–2583 (1999). Original caption: Calculated spectral dependence of  $\eta^{yyz}$  in CdSe. The data represent the spectral dependence of current injection using a 130 fs optical parametric amplifier; the vertical scales have been chosen to yield a common peak amplitude.

Experimental data extracted:

Point	Photon energy (Ev)	$V$ ( $\mu\text{V}$ )
01	1.658	0.15
02	1.687	0.20
03	1.697	0.45
04	1.722	2.65
05	1.727	2.80
06	1.735	3.00
07	1.747	4.20
08	1.757	5.55
09	1.760	5.75
10	1.765	6.40
11	1.770	7.40
12	1.787	10.15
13	1.797	10.80
14	1.807	10.30
15	1.815	9.80
16	1.825	9.40
17	1.830	9.30
18	1.835	9.35
